

Table of Contents

Executive Summary	vii
Adaptive Environmental Management	vii
Adaptive Management for the Channel Improvement Project	viii
The Adaptive Management Team.....	ix
Stakeholder Participation	ix
CRCIP Adaptive Management Process	x
Performance Measures and Risk Endpoints	xi
Monitoring Actions and Decision Criteria.....	xi
Sturgeon, Smelt, Dungeness Crab, Sediment	xiii
Ecosystem Evaluation Actions	xiv
Uncertainty.....	xv
Comprehensive Adaptive Management in the Lower Columbia River.....	xvi
Part 1. Strategic Plan.....	1
1-1 Introduction	1
Adaptive Management	1
System State.....	3
1-2 Components of the AEM Plan.....	4
1-3 Management Goals and Objectives	4
Vision and Mission	4
Principles.....	5
Goals	6
1-4 Management and Decision-making Process.....	7
Decision Framework	7
Ecological Risk Assessment	11
Part 2. Channel Improvement AEM Plan	14
2-1 Introduction	14
History of AEM in the Lower Columbia River	14
Study Area	15
Time Scales	15
Scope.....	16
2-2 Control Theory Model	17
2-3 Organizational Structure and Management Interactions	20
Adaptive Management Team.....	20
Adaptive Management Technical Support.....	21
2-4 Performance Measures and Risk Endpoints	22
2-5 Decision Criteria.....	23
2-6 Proposed AEM Process	24
2-7 Stakeholder Involvement, Documentation, and Transparency.....	25
Part 3. Technical Support of the AEM Plan.....	29
3-1 Monitoring Actions.....	29
USACOE' Monitoring Actions.....	29
Coordinated and Integrated Monitoring Program.....	31
3-2 Ecosystem Evaluation Actions	33

3-3 Identification of Models	35
Conceptual Models	35
Operational and Forecasting Models	36
3-4 Identifying, Characterizing, and Addressing Uncertainties.....	38
Part 4. Broader Considerations in AEM Planning.....	40
4-1 Discussion.....	40
Challenges to Implementing an AEM Process	40
Surmounting Barriers to AEM.....	41
4-2 A Comprehensive, Integrated AEM Plan	42
References.....	43
List of Acronyms & Abbreviations	46
Appendix A Salmonid Conceptual Models	
Appendix B Adaptive Management Team Organization & Plan Operation	
Appendix C Adaptive Management Section 401 Water Quality Certification	
Appendix D Decision Criteria	
Appendix E Combined Conditions	

List of Figures

Figure 1.1. General framework for AEM in the context of risk-based decision-making and decision making under uncertainty.1	8
Figure 2.1. AEM model formulated in terms of control theory.....	18
Figure 2.2. Flow chart describing the proposed AEM Process in support of the Channel Improvement Project.....	27

List of Tables

Table 1.1. Components of a decision-making process (Rubenstein 1975).....	7
Table 1.2. Comparison of the decision framework to the LCR AEM Plan.	13
Table 2.1 Federal Register notices for final rules that list species, designate critical habitat, or apply protective regulations to ESU considered in this consultation.	16
Table 3.1. Integration of LCR ecosystem conceptual model, monitoring, and ecosystem evaluation actions.....	37
