<sup>&</sup>lt;sup>1</sup> Map(s)/figure(s) are attached to the AJD provided to the requestor.

<sup>&</sup>lt;sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>&</sup>lt;sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

### D. Excluded Waters or Features

Excluded waters (	Excluded waters $((b)(1) - (b)(12))$ :4						
Exclusion Name	Exclusion	n Size	Exclusion <sup>5</sup>	Rationale for Exclusion Determination			
Wetland	0.6	acre(s)	(b)(1) Non-adjacent wetland.	The palustrine forested seasonally flooded wetland is not an adjacent wetland. It does not abut an a(1)-(3) water, and it is physically isolated from any (a)(1)-(3) water. It is not inundated by flooding from any (a)(1)-(3) water. Surface water flows under Taylor Way and enters the north portion of the site, which flows into a pond to the south; at the south end of the pond there is a culvert that conveys flow into the Fernhill Treatment Wetlands, which are separated from the Tualatin River by SW Geiger Road. There is no direct connection from these wetlands to a navigable waterway.			

### **III. SUPPORTING INFORMATION**

- **A. Select/enter all resources** that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.
  - ☑ Information submitted by, or on behalf of, the applicant/consultant: "1280 SW Fern Hill Road, Wetland Delineation Report, Forest Grove, Washington County, Oregon" prepared by Wetland Solutions Northwest, LLC dated April 2016

This information is and is not sufficient for purposes of this AJD.

Rationale: The delineation is sufficient; however, the document states that the wetlands have a direct surface connection to the Tualatin River which there is no evidence to support.

<sup>&</sup>lt;sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>&</sup>lt;sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
