

U.S. ARMY CORPS OF ENGINEERS REGULATORY PROGRAM APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM) NAVIGABLE WATERS PROTECTION RULE

I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): September 21, 2020

ORM Number: NWP-2020-00263

Associated JDs: N/A or ORM numbers and identifiers (e.g. HQS-2020-00001-MSW-MITSITE)

Review Area Location¹:

State/Territory: OR City: Molalla County/Parish/Borough: Clackamas County Center Coordinates of Review Area: Latitude 45.14882 Longitude -122.590529

 The review area is comprised entirely of dry land (i.e., there are no waters or including wetlands, of any kind in the entire review area). Rationale: N/A or definition to the complete are "navigable waters of the United States" within Rivers and Harbors A within the review area (complete table in section II.B). There are "waters of the United States" within Clean Water Act jurisdiction with area (complete appropriate tables in section II.C). There are waters or water features excluded from Clean Water Act jurisdiction area (complete table in section II.D). 						
		1899 Section 10 (§ 10) ²	Deticurals for \$ 40 Determination			
§ 10 Name	§ 10 Size	§ 10 Criteria	Rationale for § 10 Determination			
N/A	1.2	04				
N/A Clean Water A Territorial Sea (a)(1) Name	Act Section 4 s and Traditio (a)(1) Size	nal Navigable Waters ((a)	Rationale for (a)(1) Determination			
N/A Clean Water A Territorial Sea	Act Section 4 s and Traditio	nal Navigable Waters ((a)	<u> </u>			
Clean Water A Territorial Sea (a)(1) Name N/A	Act Section 4 s and Tradition (a)(1) Size	nal Navigable Waters ((a)	Rationale for (a)(1) Determination			
N/A Clean Water A Territorial Sea (a)(1) Name	Act Section 4 s and Tradition (a)(1) Size	nal Navigable Waters ((a)	Rationale for (a)(1) Determination			
Clean Water A Territorial Sea (a)(1) Name N/A Tributaries ((a)	Act Section 4 s and Tradition (a)(1) Size N/A)(2) waters):	nal Navigable Waters ((a) (a)(1) Criteria N/A	Rationale for (a)(1) Determination N/A			

¹ Map(s)/Figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

U.S. ARMY CORPS OF ENGINEERS REGULATORY PROGRAM APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM) NAVIGABLE WATERS PROTECTION RULE

D. Excluded Waters or Features

Excluded waters $((b)(1) - (b)(12))^4$:

Exclusion Name	Exclusion Size	Exclusion⁵	Rationale for Exclusion Determination
NWP-2020-263 Wetland A	0.08 acres	(b)(1) Non-adjacent wetland	Wetland A is a palustrine emergent wetland located in the central portion of the site. This wetland flows south to north where it flows into a storm drain in the Highway 211 right-of-way. Wetland A does not abut a territorial sea (a)(1), a
			tributary (a)(2), or an impoundment of jurisdictional waters (a)(3). It is not inundated by flooding from a water identified in paragraph (a)(1), (2), or (3) in a typical year. It is not separated from a water identified in paragraph (a)(1), (2), or (3) only by a natural berm, bank, dune, or similar natural feature. Wetland A is not physically separated from a water identified in paragraph (a)(1), (2), or (3) only by an artificial dike, barrier, or similar artificial structure that allows for a direct hydrological surface connection between the wetland and a water identified in paragraph (a)(1), (2), or (3).
			The wetland connects downslope to Bear Creek through a series of stormwater pipes and roadside ditches. The stormwater pipes and roadside ditches are not tributaries. Therefore, Wetland A does not meet the definition of an adjacent wetland. Wetland A is excluded under paragraph (b)(1), and is not a jurisdictional water of the U.S.

III. SUPPORTING INFORMATION

Α.	Select/enter all resources that were used to aid in this determination and attach data/maps to this
	document and/or references/citations in the administrative record, as appropriate.

X	Information submitted by, or on behalf of, the applicant/consultant: Title(s) and date(s)
	Wetland Delineation Report, dated July 2019.

This information is sufficient for purposes of this AJD.

Rationale: N/A

Data sheets prepared by the Corps: Title(s) and/or date(s).

X	Photographs: (NA, aerial, other, aerial and other) Title(s) and/or date(s). Figure 5 of the
	Wetland Delineation Report, dated July 2019 (Google Earth image, July 16, 2018); Photo
	points in the Wetland Delineation Report, dated July 2019. Additional ground-level
	photographs taken March 2020.

Corps Site visit(s) conducted on: Date(s).

Previous Jurisdictional Determinations (AJDs or PJDs): ORM Number(s) and date(s).

____ Antecedent Precipitation Tool: <u>provide detailed discussion in Section III.B.</u>

¹ Map(s)/Figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
