

**US ARMY CORPS OF ENGINEERS (USACE)
REGULATORY PROGRAM
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)
2023 RULE**

**OMB Control Number: 0710-0024
Expiration Date: 09/30/2023**

AGENCY DISCLOSURE NOTICE

The public reporting burden for this collection of information, 0710-0024, is estimated to average 4 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or burden reduction suggestions to the Department of Defense, Washington Headquarters Services, at whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): [7/17/2023](#)

ORM Project Name: [Harper Houf Peterson Righellis- NE Marine Dr - Marine Drive Trail Wetland JD \(JD Only\)](#)

ORM Identification Number: [NWP-2023-205](#)

- ☐ Other sites (e.g., offsite mitigation sites, disposal sites or other review areas, etc.) are associated with this action and are recorded on a different jurisdictional determination (JD) form(s).

Associated JD Names and Numbers: [N/A](#)

Review Area Location: State/Territory: Oregon City: [Gresham](#)

County/Parish/Borough: [Multnomah](#)

Center Coordinates of Review Area: Latitude: [45.557698°N](#), Longitude: [-122.438291°W](#)

Limits of review area: [See Attached Map](#)

II. SUMMARY²

Check all that apply. At least one box from the following list **MUST** be selected. Complete the corresponding tables in Section III., summarize data sources in Section IV., and attach completed Appendices A and/or B when specified.

- ☐ The review area is comprised entirely of dry land (i.e., there are no waters such as streams, rivers, wetlands, lakes, ponds, tidal waters, ditches, and the like in the entire review area). Rationale: [Provide Rationale for Dry Land Determination](#)
- ☐ There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete the table in Section III.A.).
- ☐ There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section III.B. and complete and attach appendices as appropriate).
- ☒ Potentially jurisdictional waters and/or features were assessed within the review area and determined to be non-jurisdictional (complete appropriate tables in Section III.C. and complete and attach appendices as appropriate).

¹ The final rule “Revised Definition of ‘Waters of the United States’” (2023 Rule) was published in the *Federal Register* on 18 January 2023 and the effective date is 20 March 2023. See <https://www.federalregister.gov/documents/2023/01/18/2022-28595/revised-definition-of-waters-of-the-united-states>.

² Map(s)/figure(s) or descriptions of the review area and any jurisdictional waters are attached to the AJD provided to the requestor.

**US ARMY CORPS OF ENGINEERS (USACE)
REGULATORY PROGRAM
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)
2023 RULE**

III. FINDINGS IN THE REVIEW AREA

A. Jurisdictional under the Rivers and Harbors Act of 1899³ (Section 10)⁴

Section 10 Waters			
Section 10 water name	Section 10 size in review area		Type of Section 10 water
N/A	N/A	N/A	N/A.
Rationale for determination: N/A			

B. Jurisdictional under the Clean Water Act

Paragraph (a)(1) waters: ⁵ Waters which are: (i) Currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide (Traditional Navigable Waters); (ii) The territorial seas; or (iii) Interstate waters, including interstate wetlands			
(a)(1) water name	(a)(1) size in review area		Type of paragraph (a)(1) water
N/A	N/A	N/A	N/A.
Rationale for determination: N/A			

Paragraph (a)(2) waters: Impoundments of waters otherwise defined as waters of the United States under this definition, other than impoundments of waters identified under paragraph (a)(5)			
(a)(2) water name	(a)(2) size in review area		Type of paragraph (a)(2) water
N/A	N/A	N/A	N/A.
Rationale for determination: N/A			

³ If the navigable water of the United States is not subject to the ebb and flow of the tide and not included on the district's list of Rivers and Harbors Act (RHA) Section 10 navigable waters of the United States list do NOT use this form to make a report of findings to support a determination that the water is a navigable water of the United States. The district must follow the procedure outlined in 33 CFR part 329.14 to make a determination that water is a navigable water of the United States subject to Section 10 of the Rivers and Harbors Act.

⁴ USACE has authority under both Section 9 and Section 10 of the Rivers and Harbors Act of 1899 but for convenience, in this AJD form, jurisdiction under RHA will be referred to as Section 10.

⁵ A stand-alone TNW determination for a water that is not subject to Section 9 or 10 of RHA is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

**US ARMY CORPS OF ENGINEERS (USACE)
REGULATORY PROGRAM
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)
2023 RULE**

Paragraph (a)(3) waters: Tributaries of waters identified in paragraph (a)(1) or (2): (i) That are relatively permanent, standing or continuously flowing bodies of water; or (ii) That either alone or in combination with similarly situated waters in the region, significantly affect the chemical, physical, or biological integrity of waters identified in paragraph (a)(1)

(a)(3) water name	(a)(3) size in review area	Type of paragraph (a)(3) water
N/A	N/A	N/A

Rationale for determination: N/A

Paragraph (a)(4) waters: Wetlands adjacent to the following waters: (i) Waters identified in paragraph (a)(1); or (ii) Relatively permanent, standing or continuously flowing bodies of water identified in paragraph (a)(2) or (a)(3)(i) and with a continuous surface connection to those waters; or (iii) Waters identified in paragraph (a)(2) or (3) when the wetlands either alone or in combination with similarly situated waters in the region, significantly affect the chemical, physical, or biological integrity of waters identified in paragraph (a)(1)

(a)(4) water name	(a)(4) size in review area	Adjacency criteria
N/A	N/A	N/A
Type of paragraph (a)(4) water	N/A	

Rationale for determination: N/A

Paragraph (a)(5) waters: Intrastate lakes and ponds, streams, or wetlands not identified in paragraphs (a)(1) through (4): (i) That are relatively permanent, standing or continuously flowing bodies of water with a continuous surface connection to the waters identified in paragraph (a)(1) or (a)(3)(i); or (ii) That either alone or in combination with similarly situated waters in the region, significantly affect the chemical, physical, or biological integrity of waters identified in paragraph (a)(1).⁶

(a)(5) water name	(a)(5) size in review area	Type of paragraph (a)(5) water
N/A	N/A	N/A

Rationale for determination: N/A

⁶ In implementing the significant nexus standard, the agencies generally intend to analyze waters under paragraph (a)(5) individually to determine if they significantly affect the chemical, physical, or biological integrity of a paragraph (a)(1) water.

**US ARMY CORPS OF ENGINEERS (USACE)
REGULATORY PROGRAM
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)
2023 RULE**

C. Waters or features that are not jurisdictional under the Clean Water Act

Waters analyzed under paragraph (a)(3)(ii), (a)(4)(iii), or (a)(5)(ii) and determined non-jurisdictional: Tributaries of waters identified in paragraph (a)(1) or (2); and/or wetlands adjacent to waters identified in paragraph (a)(2) or (3); and/or intrastate lakes and ponds, streams, or wetlands not identified as (a)(1) through (4) waters; that either alone or in combination with similarly situated waters in the region, do not significantly affect the chemical, physical, or biological integrity of waters identified in paragraph (a)(1).

Water name	Water size in review area		Type of water for which significant nexus was not met:
N/A	N/A	N/A	N/A
Rationale for determination: N/A			

(b)(1) – (b)(8) Excluded Features⁷

Excluded feature name	Excluded feature size in review area		Exclusion ⁸
Ditch A	16	Linear feet	(b)(3) Ditches (including roadside ditches) excavated wholly in and draining only dry land and that do not carry a relatively permanent flow of water

Rationale for determination: Ditch A is on NE Marine Drive near a trail in Gresham, Multnomah County, Oregon and drains generally south to an offsite wetland. The Marine Drive Trail Wetland Determination, dated March 24, 2023, Photo 6 and the Wetland Determination Data Form show hydrophytic vegetation, Himalayan Blackberry (*Rubus armeniacus*), in the ditch. A review of the United States Department of Agriculture Natural Resources Conservation Service soil survey depicts the project area as Sauvies silty clay loam, protected, which is hydric and poorly drained soil in Multnomah County, Oregon. However, the soils observed at the sampling point SM3 do not have hydric characteristics. The United States Fish and Wildlife Service National Wetlands Inventory (NWI) Mapper has NWI resources within the review area, however none are present where Ditch A is located. Additionally, in the Oregon Rapid Wetland Assessment Protocol & Stream Function Assessment Method Map Viewer, there are no local wetlands mapped within the ditch. No mapped tributaries are present within the review area based on the United States Geological Survey (USGS) National Map – Advanced Viewer and the Oregon Department of Geology and Mineral Industries LiDAR layer. NE Marine Drive has been present since 1961 as supported by historic topographic maps from USGS TopoView. There is no presence of a relocated intermittent or perennial tributary in the historical topographic maps. The Corps has found no information to indicate Ditch A is a relocated tributary or that Ditch A carries a relatively permanent flow of water or surface connection to tributaries. The observed conditions during the wetland delineation, during the wet season for the area, did not include any surface water at sample point SM3. The Corps has determined Ditch A is not a Water of the United States and has been determined to meet an exclusion pursuant to 33 CFR 328.3(b)(3). Ditch A is a roadside ditch that is excavated wholly in and draining only dry land and does not carry a relatively permanent flow of water.

⁷ Transient features on the landscape that are difficult to document due to their non-permanent nature, such as rills and gullies, may not be specifically identified on the AJD form unless a requestor specifically asks a USACE district to do so. USACE districts may, in case-by-case instances, elect to document any such feature on a case-by-case basis, such as when the feature is relevant to analysis of the jurisdictional status of another water.

⁸ Note the full text of the exclusions for (b)(1)-(6) and (b)(8) are included in the dropdown list, while the text for the (b)(7) exclusion is truncated due to space limitations. The full text of the (b)(7) exclusion is as follows: (b)(7) Waterfilled depressions created in dry land incidental to construction activity and pits excavated in dry land for the purpose of obtaining fill, sand, or gravel unless and until the construction or excavation operation is abandoned and the resulting body of water meets the definition of waters of the United States

REGULATORY PROGRAM
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)
2023 RULE**

IV. SUPPORTING INFORMATION

A. Paragraph (a)(1) water that is outside the review area:

- a. Provide the name of the paragraph (a)(1) water: [Columbia River](#)
- b. Type of paragraph (a)(1) water: [\(a\)\(1\)\(i\) Water is currently used, was used in the past, or may be susceptible to use in interstate or foreign commerce, including waters subject to the ebb and flow of the tide](#)
- c. Provide the rationale for jurisdiction of the paragraph (a)(1) water: [The Columbia River is on the October 1993 Portland District list of Navigable Riverways within the State of Oregon.](#)

B. Significant nexus analyses

- ☐ Appendix A is attached and includes the significant nexus analysis for any waters in the review area that were evaluated under paragraph (a)(3)(ii) and/or paragraph (a)(4)(iii).
- ☐ Appendix B is attached and includes the significant nexus analyses for any waters in the review area that were evaluated under paragraph (a)(5)(ii).
- ☒ There are no waters in the review area that require evaluation under the significant nexus standard. Therefore, neither Appendix A nor Appendix B are included with this form

C. Data, models, and other relevant methods Select/enter all resources that were used to support this determination and include data/maps and/or references/citations in the administrative record, as appropriate.

☒ Aquatic resources delineation submitted by, or on behalf of, the requestor: [Marine Drive Trail Wetland Determination, March 24, 2023](#)

The aquatic resources delineation submitted by or on behalf of the requestor is sufficient for purposes of this AJD [Yes](#)

Rationale: [N/A](#)

- ☐ Aquatic resources delineation prepared by the USACE: [Title\(s\) and Date\(s\)](#)
- ☐ Wetland field data sheets prepared by the USACE: [Title\(s\) and Date\(s\)](#)
- ☐ OHWM data sheets prepared by the USACE: [Title\(s\) and Date\(s\)](#)
- ☐ USACE site visit: Date(s) of site visit(s): [Date\(s\) of Site Visit\(s\)](#), [Title\(s\) and Date\(s\) of Site Visit Summary Document\(s\)](#)
- ☐ Previous Jurisdictional Determinations (AJDs or PJDs) addressing the same (or portions of the same) review area: [ORM Number\(s\) and Date\(s\)](#)
- ☒ Photographs: [Marine Drive Trail Wetland Determination, March 24, 2023](#)
- ☒ Aerial Imagery: [Google Earth Pro, May 5, 2023 and June 23, 2023](#)
- ☒ LiDAR: [Oregon Department of Geology and Mineral Industries LiDAR layer, May 5, 2023](#)
- ☒ USDA NRCS Soil Survey: [United States Department of Agriculture Natural Resources Conservation Web Soil Survey, May 5, 2023 and June 23, 2023](#)
- ☒ USFWS NWI maps: [United States Fish and Wildlife Service National Wetland Inventory Mapper, May 5, 2023 and June 23, 2023](#)
- ☒ USGS topographic maps: [United States Geological Survey TopoView, June 23, 2023](#)
- ☒ USGS NHD data/maps: [Northwestern Division Regulatory Viewer \(NHD Layer\), May 5, 2023](#)
- ☐ USGS Dynamic Surface Water Extent: [Title\(s\) and Date\(s\)](#)
- ☒ Section 10 navigability resource used: [U.S. Army Corps of Engineers, Navigable Riverways within the State of Oregon, October 1993.](#)
