Note 1: The Port owns and operates a small hydraulic dredge and with the limitations of the equipment, in-water work window, and funding, the Port can only achieve 20,000 to 50,000-cy of dredged material per year. The dredging therefore focuses on the areas where accumulation has the greatest impacts on marina operations. Maintenance dredging typically removes 1 to 3 feet of material in selected areas based on need.

Legend

-  Outfall
-  Dredge area
-  Priority dredging area (See Note 1)

Bathymetry (MLLW)

-  0 to -10 ft
-  -10 to -16 ft
-  -16 and deeper
