

# Dredge Material Placement Network Modifications: Rice Island shoreline placement and Howard Island in-water dredged material re-handling site

## Project area maps

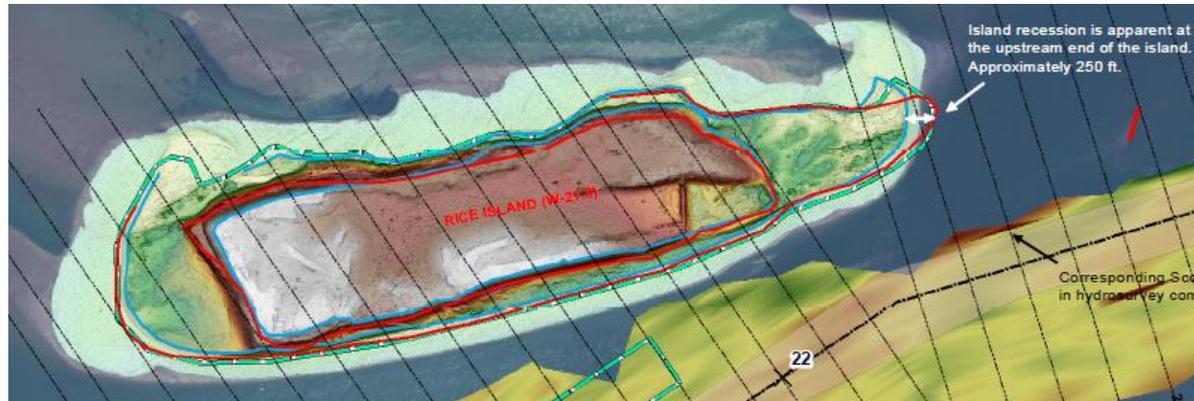

Figure 1. Map of Proposed Action to add shoreline placement at Rice Island. The placement area is noted by white arrows indicating the location of shoreline erosion on the eastern end of the island.

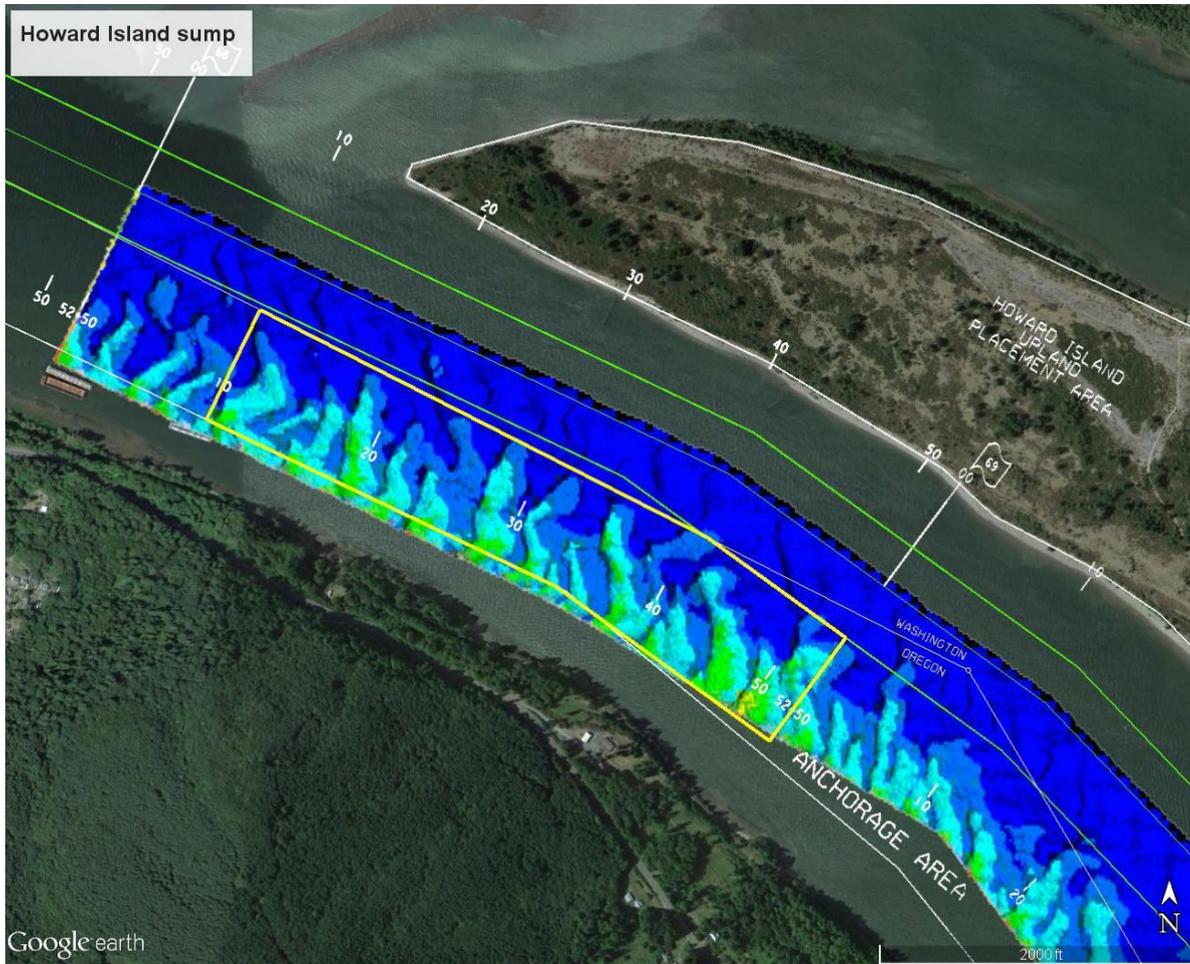

Figure 2. Proposed Howard Island sump will be specified within the general location box outlined in yellow. Bathymetric survey dated 24 July 2014.
