| Unnamed Tributary to Lone Pine Creek | Perennial | Rogue River | No | This unnamed tributary provides perennial flows to Lone Pine Creek which flows to Bear Creek and then the Rogue River. The tributary has been piped underground along several property lines before connecting to Lone Pine Creek. This unnamed tributary has also been called the North Fork Lone Pine Creek. There are no breaks in the route taken by the tributary. The flow path of the creek is seen on the USGS NHD Map where the piped section is reflected as well. |

Table 6. (a)(6) Adjacent Waters

| (a)(6) Waters Name | (a)(1)-(a)(5) Water Name to which this Water is Adjacent | Rationale for (a)(6) Designation and Additional Discussion. Identify the type of water and how the limits of jurisdiction were established (e.g., wetland, 87 Manual/Regional Supplement); explain how the 100-year floodplain and/or the distance threshold was determined; whether this water extends beyond a threshold; explain if the water is part of a mosaic, etc. |
|--------------------|--|--|
| Wetland 1 | Unnamed Tributary to Lone Pine Creek | Wetland 1 was delineated under the 87 manual with the Western Mountain Valley Coastal Supplement. The site was previously delineated in 2007 under the same conditions and the boundaries of the wetlands have not really changed in size. This particular wetland abuts the unnamed tributary. There is direct hydrological connection to the waterway from this wetland. |
| Wetland 2 | Unnamed Tributary to Lone Pine Creek | Wetland 2 was delineated under the 87 manual with the Western Mountain Valley Coastal Supplement. The site was previously delineated in 2007 under the same conditions and the boundaries of the wetlands have not really changed in size. This particular wetland is approximately 80 feet from the unnamed tributary. During winter months, there is a direct hydrological connection to the waterway from this wetland. |
| Wetland 3 | Unnamed Tributary to Lone Pine Creek | Wetland 3 was delineated under the 87 manual with the Western Mountain Valley Coastal Supplement. The site was previously delineated in 2007 under the same conditions and the boundaries of the wetlands have not really changed in size. This particular wetland is approximately 300 feet from the unnamed tributary and 275 feet |
