INTERIM APPROVED JURISDICTIONAL DETERMINATION FORM U.S. Army Corps of Engineers

SECTION I: BACKGROUND INFORMATION

A.COMPLETION DATE FOR APPROVED JURISDICTIONAL DETERMINATION (AJD): 15 April 2019

B.ORM NUMBER IN APPROPRIATE FORMAT (e.g., HQ-2015-00001-SMJ): NWP-2018-556

C.PROJECT LOCATION AND BACKGROUND INFORMATION:

State: Oregon County/parish/borough: Jackson County City: Central Point
Center coordinates of site (lat/long in degree decimal format): Lat. 42.41075°, Long. -122.88234°.
Map(s)/diagram(s) of review area (including map identifying single point of entry (SPOE) watershed and/or potential jurisdictional areas where applicable) is/are: attached in report/map titled .
 Other sites (e.g., offsite mitigation sites, disposal sites, etc.) are associated with this action and are recorded on a different jurisdictional determination (JD) form. List JD form ID numbers (e.g., HQ-2015-00001-SMJ-1): .

D.REVIEW PERFORMED FOR SITE EVALUATION:

- Office (Desk) Determination Only. Date: April 2, 2019.
 Office (Desk) and Field Determination. Office/Desk Dates: Field Date(s): .

SECTION II: DATA SOURCES

Check all that were used to aid in the determination and attach data/maps to this AJD form and/or references/citations in the administrative record, as appropriate.

- Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant. Title/Date:
Submitted as part of the wetland delineation report "Clinger Shop Wetland Delineation" completed by Ms. Andrea Rabe, dated October 21, 2018, and received by Corps Regulatory on November 7, 2018.
- Data sheets prepared/submitted by or on behalf of the applicant/consultant.
 Data sheets/delineation report are sufficient for purposes of AJD form. Title/Date: .
 Data sheets/delineation report are not sufficient for purposes of AJD form. Summarize rationale and include information on revised data sheets/delineation report that this AJD form has relied upon:
Revised Title/Date: Sample Location 3 data sheet; January 15, 2019.
- Data sheets prepared by the Corps. Title/Date: .
- Corps navigable waters study. Title/Date: .
- CorpsMap ORM map layers. Title/Date: .
- USGS Hydrologic Atlas. Title/Date: .
- USGS, NHD, or WBD data/maps. Title/Date: 171003080202 (Whetstone Creek-Rogue River), viewed January 4, 2019.
- USGS 8, 10 and/or 12 digit HUC maps. HUC number: 171003080202 (Whetstone Creek-Rogue River).
- USGS maps. Scale & quad name and date: 7.5 minute, Sams Valley 2017, viewed January 4, 2019.
- USDA NRCS Soil Survey. Citation: Custom Soil Resource Report for Jackson County Area, Oregon, Parts of Jackson and Klamath Counties, NWP-2018-556, dated January 4, 2019.
- USFWS National Wetlands Inventory maps. Citation: Viewed January 4, 2019.
- State/Local wetland inventory maps. Citation: .

- FEMA/FIRM maps. Citation: Jackson County, Oregon and Incorporated Areas, Panel 1767 of 2327, Nap Number 41029C1767F, effective date May 3, 2011.
- Photographs: Aerial. Citation: Submitted as part of the wetland delineation report "Clinger Shop Wetland Delineation" completed by Ms. Andrea Rabe, dated October 21, 2018, and received by Corps Regulatory on November 7, 2018. or Other. Citation: Submitted as part of the wetland delineation report "Clinger Shop Wetland Delineation" completed by Ms. Andrea Rabe, dated October 21, 2018, and received by Corps Regulatory on November 7, 2018.
- LiDAR data/maps. Citation: .
- Previous JDs. File no. and date of JD letter: .
- Applicable/supporting case law: .
- Applicable/supporting scientific literature: .
- Other information (please specify): Google Earth site elevation profile.

SECTION III: SUMMARY OF FINDINGS

A. RIVERS AND HARBORS ACT (RHA) SECTION 10 DETERMINATION OF JURISDICTION:

- "navigable waters of the U.S." within RHA jurisdiction (as defined by 33 CFR part 329) in the review area.

- **Complete Table 1 - Required**

NOTE: If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Section 10 navigable waters list, DO NOT USE THIS FORM TO MAKE THE DETERMINATION. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.

B. CLEAN WATER ACT (CWA) SECTION 404 DETERMINATION OF JURISDICTION: "waters of the U.S." within CWA jurisdiction (as defined by 33 CFR part 328.3) in the review area. Check all that apply.

- (a)(1): All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide. (Traditional Navigable Waters (TNWs))

- **Complete Table 1 - Required**

- This AJD includes a case-specific (a)(1) TNW (Section 404 navigable-in-fact) determination on a water that has not previously been designated as such. Documentation required for this case-specific (a)(1) TNW determination is attached.

- (a)(2): All interstate waters, including interstate wetlands.

- **Complete Table 2 - Required**

- (a)(3): The territorial seas.

- **Complete Table 3 - Required**

- (a)(4): All impoundments of waters otherwise identified as waters of the U.S. under 33 CFR part 328.3.

- **Complete Table 4 - Required**

- (a)(5): All tributaries, as defined in 33 CFR part 328.3, of waters identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

- **Complete Table 5 - Required**

- (a)(6): All waters adjacent to a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3, including wetlands, ponds, lakes, oxbows, impoundments, and similar waters.

- **Complete Table 6 - Required**

- Bordering/Contiguous.
Neighboring:

- (c)(2)(i): All waters located within 100 feet of the ordinary high water mark (OHWM) of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3.

- (c)(2)(ii): All waters located within the 100-year floodplain of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3 and not more than 1,500 feet of the OHWM of such water.

- (c)(2)(iii): All waters located within 1,500 feet of the high tide line of a water identified in paragraphs (a)(1) or (a)(3) of 33 CFR part 328.3, and all waters within 1,500 feet of the OHWM of the Great Lakes.

- (a)(7): All waters identified in 33 CFR 328.3(a)(7)(i)-(v) where they are determined, on a case-specific basis, to have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.
 - **Complete Table 7 for the significant nexus determination. Attach a map delineating the SPOE watershed boundary with (a)(7) waters identified in the similarly situated analysis. - Required**
- Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.
- (a)(8): All waters located within the 100-year floodplain of a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3 not covered by (c)(2)(ii) above and all waters located within 4,000 feet of the high tide line or OHWM of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3 where they are determined on a case-specific basis to have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.
 - **Complete Table 8 for the significant nexus determination. Attach a map delineating the SPOE watershed boundary with (a)(8) waters identified in the similarly situated analysis. - Required**
- Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.

C. NON-WATERS OF THE U.S. FINDINGS:

Check all that apply.

- The review area is comprised entirely of dry land.
- Potential-(a)(7) Waters: Waters that DO NOT have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.
 - **Complete Table 9 and attach a map delineating the SPOE watershed boundary with potential (a)(7) waters identified in the similarly situated analysis. - Required**
- Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.
- Potential-(a)(8) Waters: Waters that DO NOT have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.
 - **Complete Table 9 and attach a map delineating the SPOE watershed boundary with potential (a)(8) waters identified in the similarly situated analysis. - Required**
- Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.
- Excluded Waters (Non-Waters of U.S.), even where they otherwise meet the terms of paragraphs (a)(4)-(a)(8):
 - **Complete Table 10 - Required**
 - (b)(1): Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of the CWA.
 - (b)(2): Prior converted cropland.
 - (b)(3)(i): Ditches with ephemeral flow that are not a relocated tributary or excavated in a tributary.
 - (b)(3)(ii): Ditches with intermittent flow that are not a relocated tributary, excavated in a tributary, or drain wetlands.
 - (b)(3)(iii): Ditches that do not flow, either directly or through another water, into a water identified in paragraphs (a)(1)-(a)(3).
 - (b)(4)(i): Artificially irrigated areas that would revert to dry land should application of water to that area cease.
 - (b)(4)(ii): Artificial, constructed lakes and ponds created in dry land such as farm and stock watering ponds, irrigation ponds, settling basins, fields flooded for rice growing, log cleaning ponds, or cooling ponds.

- (b)(4)(iii): Artificial reflecting pools or swimming pools created in dry land.¹
 - (b)(4)(iv): Small ornamental waters created in dry land.¹
 - (b)(4)(v): Water-filled depressions created in dry land incidental to mining or construction activity, including pits excavated for obtaining fill, sand, or gravel that fill with water.
 - (b)(4)(vi): Erosional features, including gullies, rills, and other ephemeral features that do not meet the definition of tributary, non-wetland swales, and lawfully constructed grassed waterways.¹
 - (b)(4)(vii): Puddles.¹
 - (b)(5): Groundwater, including groundwater drained through subsurface drainage systems.¹
 - (b)(6): Stormwater control features constructed to convey, treat, or store stormwater that are created in dry land.¹
 - (b)(7): Wastewater recycling structures created in dry land; detention and retention basins built for wastewater recycling; groundwater recharge basins; percolation ponds built for wastewater recycling; and water distributary structures built for wastewater recycling.
- Other non-jurisdictional waters/features within review area that do not meet the definitions in 33 CFR 328.3 of (a)(1)-(a)(8) waters and are not excluded waters identified in (b)(1)-(b)(7).
- **Complete Table 11 - Required.**

ADDITIONAL COMMENTS TO SUPPORT AJD: The study/review area (site) consists of a residential yard with an existing residence and attendant features. The site is located north of and within the 100 year floodplain of Swanson Creek, a perennial tributary. Swanson Creek flows through Whetstone Creek to the Rogue River (which becomes a traditionally navigable water downstream of the confluence with Whetstone Creek).

The overall property abuts the creek, but the review area is bound on the south side approximately 160 feet north of the creek before a break in topography down to the creek and outside of an area of hydrophytic vegetation associated with the change in elevation. The delineation was conducted during the wet season with normal precipitation the previous three months.

A review of the Google Earth elevation profile indicates there are two areas of higher elevation between the creek and the study area. Even though the area may be mapped as floodplain, it does not appear flooding would occur from the stream. Flooding may occur near the stream, but this is outside the study area under Corps review.

The soils are mapped as Cove Clay, which is considered to be hydric. Delineation sample pits indicated the soils contain sand as well as clay. No hydric soil indicators were found during the site visit. The consultant did not observe a restrictive layer in the soil plots. The consultant explained the soil survey mapping is likely a remnant from before Swanson Creek was channelized and became incised near the project area, a result of the construction of houses.

Vegetation on the site is maintained as yard and driveway areas. Hydrophytic vegetation was observed at sample point 3 (closest to the house). However, the vegetation is facultative, not obligate or facultative wet. Because the vegetation is maintained as a yard, the consultant investigated whether difficult wetland procedures would be appropriate for each sample point in this delineation. Because no hydric soil or hydrology indicators (even secondary) were observed, the consultant would have reached the same non-wetland conclusion if the procedures were applied.

¹ In many cases these excluded features will not be specifically identified on the AJD form, unless specifically requested. Corps Districts may, in case-by-case instances, choose to identify some or all of these features within the review area.

Jurisdictional Waters of the U.S.

Default field entry is "N/A". Delete "N/A" and fill out all fields in the table where applicable for waters/features present in the review area.

Table 1. (a)(1) Traditional Navigable Waters
