MEMORANDUM

TO: Taunja Berquam, US Corps of Engineers, Portland District
Laura Hicks, US Corps of Engineers, Portland District
FROM: Greg Hartman, Dalton, Olmsted and Fuglevand, Inc.
Nancy Case O’ Bourke, Case O’ Bourke Engineering, Inc.
DATE: January 13, 2003
SUBJECT: Final Response to Cost Panel’s Comments
REF. NO:

Reference your email of January 2, 2003.

We are in agreement with your response to Review Panel Comments for Costs dated December 30, 2002.

Please note that in the comment on Quantities Along Channel Slope (Sand), we agree with your slope of 1 on 3. It was the basis for slope slough as a percentage of the “total” volume we were concerned about. We did not understand how you were applying this factor.

Thank you for your continuing effort to assure the Cost Analysis for the Columbia River Deepening is reasonable and complete.
