

Mount Solo, W-62.0

Size: Approximately 50 acres

Elevation: Approximately 10 feet above Mean Sea Level

Owner: Radakovich family

Description: The property is bounded on the north by a meandering surface water drainage, the east by a Cowlitz County Consolidated Diking District drainage, the south by a dike and the Columbia River, and the west by an undeveloped field.

The topography is nearly level across the entire site. The dike has gentle north and south slopes, and separates the majority of the site from the Columbia River. The center of the site has a slight depression, which was partially filled with water during the site reconnaissance. The northern half of the site slopes slightly to the north-northwest into the meandering surface water drainage ditch. To the west, the topography is relatively flat and similar to that of the subject property

The site has been vacant since 1996. The majority of the adjacent property to the north appears to be an equipment storage yard for Terra Firma, Inc. Adjacent to this property, to the northwest, is the Mt. Solo Landfill. Adjacent to the east of the property, and across the diking district drainage, is a disposal pond. At the southeast corner of the property (offsite) are a Cowlitz County Consolidated Diking District Number 1 pumping station and four large Bonneville Power Administration (BPA) high-voltage towers. West of the site is an undeveloped field that has historically been used for agricultural purposes.

Standing water was observed in the center of the property as well as in two drainage ditches. There are no wastewater services at the property.

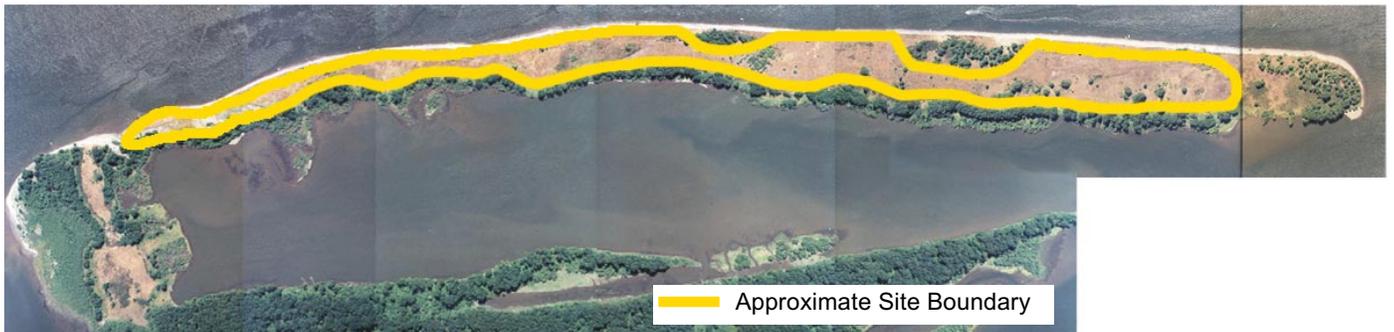

Hump Island, W-59.7

Size: 69 Acres

Owner: Washington Department of Fish and Wildlife/Washington Department of Natural Resources.

Description: Hump Island is a long thin island located between Walker Island and the Columbia River. It is approximately 9,500 feet in length with an average width of 600 feet. There are clusters of cottonwoods on the north and south ends of the island. The site is currently covered by disposal material deposited during maintenance dredging.

Crims Island, O-57.0

Size: Approximately 40 acres

Elevation: 0 to 20 feet above Mean Sea Level

Owner: Oregon Division of State Lands

Description: Most of the subject property has been covered in the past with material dredged from the Columbia River. Steep 5- to 25-foot banks drop off the edges of the sand pile to the Columbia River and adjacent offsite portions of Crims Island. The oblong-shaped property is approximately 3,300 feet long by 500 feet wide and is diked. It is situated along the upstream end of the island.

A narrow slough is located on the south-southwest side of the site, and nearly separates the site from the main body of Crims Island. Wooded areas extend along the southern and western boundaries of the property. These wooded areas will be avoided during disposal.

Port Westward, O-54.0

Size: Approximately 50-acre site

Elevation: 5 to 20 feet above Mean Sea Level

Owner: Port of St. Helens

Description: The site is bordered on the northeast by the river and on all other sides by a PGE gas generating facility. The site was once a storage facility and also the location for US Army materiel and weapons loading construction during the World War II era. The entire site is currently grassy open space with no structures. A decommissioned railroad line runs the length of the property.

Approximate Site Boundary

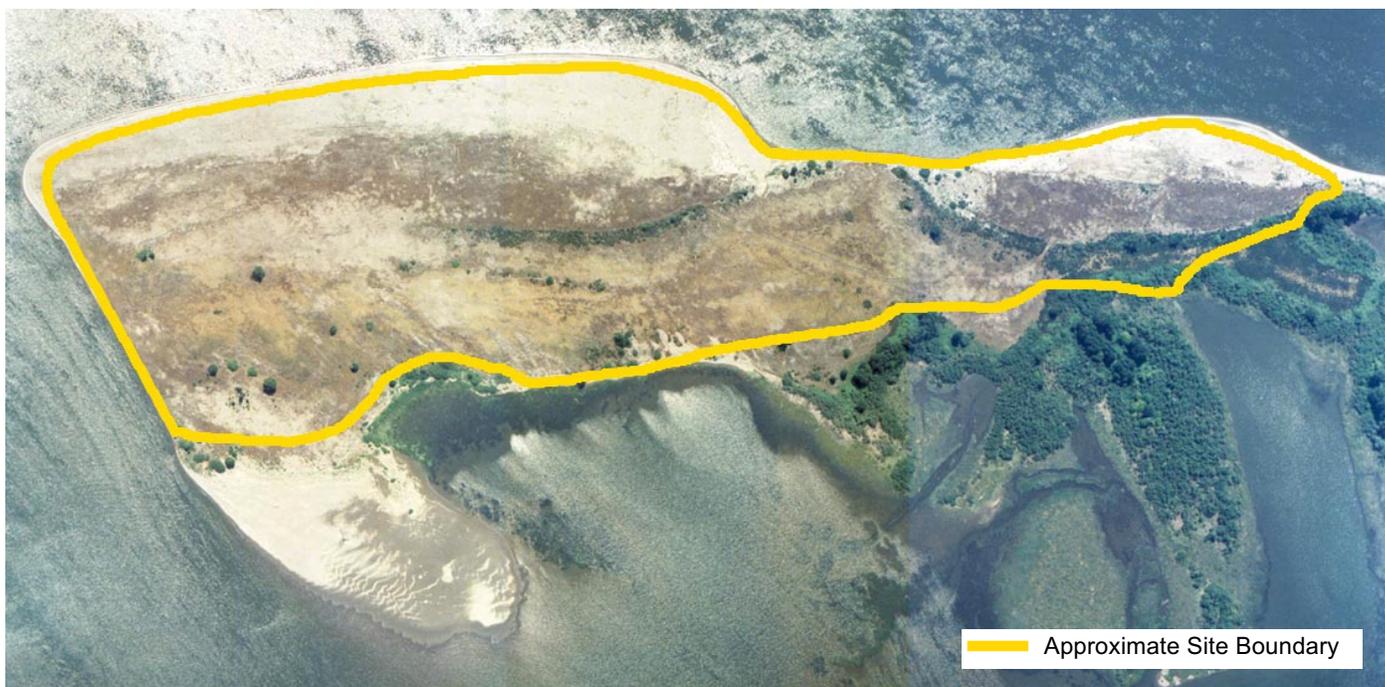

Brown Island, W-46.3/W-46.0

Size: 72 Acres

Elevation: 5 to 10 feet above Mean Sea Level

Owner: Washington Department of Natural Resources

Description: Brown Island is located at the upper end of Puget Island and is an established disposal site for maintenance dredge material. There is no tree cover on the site. Brown Island is bordered by White Island. A low swale separates the two and is inundated seasonally. No other improvements are located on the island.

Puget Island, W-44.0

Size: Approximately 100-acre site

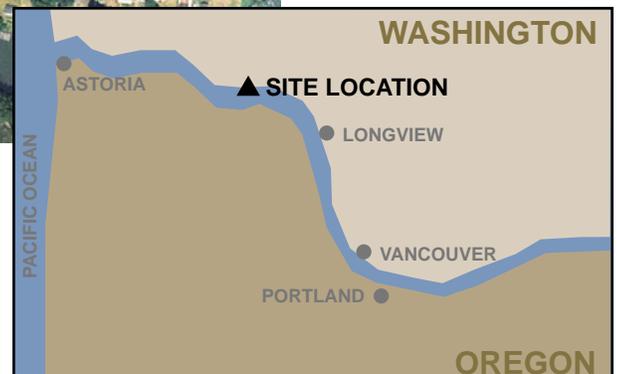

Elevation: 0 to 15 feet above Mean Sea Level

Owner: Vik family

Description: The site is bordered on the north, west, and east by other agricultural lands and by private residences to the south. The current use of the subject property is agriculture. There are several structures related to the farming operation and one home will be relocated to accommodate material disposal.

— Approximate Site Boundary

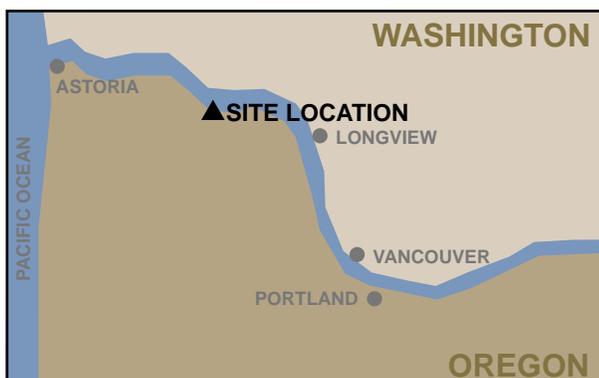

James River, O-42.9

Size: 53 Acres

Elevation: 15-30 feet above Mean Sea Level

Owner: Fort James (Georgia Pacific)

The site is located below the mouth of the Westport Slough. The original site was 59 acres, but was reduced to 53 acres to avoid a small wetland. The site was used previously for maintenance dredging disposal and is currently covered with disposal material and small clusters of trees and ground vegetation.
